

Bone Morphogenetic Protein-2 Human Recombinant

Catalogue Number	IY-261
Synonyms	BMP-2, BMP2A.
Introduction	BMP2 belongs to the transforming growth factor-beta (TGFB) superfamily.
	Bone morphogenic protein induces bone formation. BMP2 is a candidate
	gene for the autosomal dominant disease of fibrodysplasia (myositis)
	ossificans progressiva.
Patent Rights	The sale and/or commercial use of Recombinant Adiponectin is prohibited
	in the United States of America (U.S.A).
Description	Bone Morphogenetic Protein-2 Human Recombinant produced in E.Coli is
	a homodimeric, non-glycosylated polypeptide chain containing 2x115
	amino acids and having a molecular mass of 26kDa.
	The BMP-2 is purified by proprietary chromatographic techniques.
Source	Escherichia Coli.
Physical Appearance	Sterile Filtered White lyophilized (freeze-dried) powder.
Formulation	BMP2 was lyophilized from a concentrated (1mg/ml) sterile solution
	containing 10mM sodium citrate pH=3.5.
Solubility	It is recommended to reconstitute the lyophilized Bone Morphogenetic
	Protein-2 in sterile 20mM AcOH (acetic Acid) not less than 100µg/ml,
	which can then be further diluted to other aqueous solutions.
Stability	Lyophilized Bone Morphogenetic Protein-2 although stable at room
	temperature for 3 weeks, should be stored desiccated below -18°C. Upon
	reconstitution BMP2 should be stored at 4°C between 2-7 days and for
	future use below -18°C.
	For long term storage it is recommended to add a carrier protein (0.1%
	HSA or BSA).
	Please prevent freeze-thaw cycles.
Purity	Greater than 95.0% as determined by
	(a) Analysis by RP-HPLC.
	(b) Analysis by SDS-PAGE.
Amino acid sequence	MQAKHKQRKR LKSSCKRHPL YVDFSDVGWN DWIVAPPGYH AFYCHGECPF
	PLADHLNSTN HAIVQTLVNS VNSKIPKACC VPTELSAISM LYLDENEKVV
	LKNYQDMVVE GCGCR.
Biological Activity	The ED50 as determined by its ability to induce alkaline phosphatase
	production by ATDC-5 cells is 0.5-1.0 μ g/ml.
Protein content	Protein quantitation was carried out by two independent methods:
	1. UV spectroscopy at 280 nm using the absorbency value of 1.4 as the
	extinction coefficient for a 0.1% (1mg/ml) solution. This value is calculated
	by the PC GENE computer analysis program of protein sequences
	(IntelliGenetics).
	2. Analysis by RP-HPLC, using a standard solution of BMP-2 as a Reference
	Standard.

	Products are furnished for LABORATORY RESEARCH USE ONLY. The
Usage	product may not be used as drugs, agricultural or pesticidal products, food
	additives or household chemicals.
